

EQUIPMENT SUPPORT HAVING ROTATABLE BUMPERS AND HOOKS

ABSTRACT OF THE DISCLOSURE

5 A patient care equipment support (20) includes an equipment
supporting portion (100) configured to support patient care equipment (24, 26), and at
least one arm (174) pivotally coupled to the equipment supporting portion (100), and
configured to support at least one IV container (24). The equipment support (20) may
include at least roller bumper (144) rotatably coupled to the equipment supporting
10 portion (100). The equipment supporting portion (100) may include an upper
horizontal member (110), a lower horizontal member (112) and a pair of horizontally
spaced vertical posts (114, 116) extending between the upper and lower members
(110, 112). Illustratively, the arm (174) is pivotally coupled to one of the posts (114,
116). The upper and lower horizontal members (110, 112) may define a space
15 therebetween for receiving infusion management equipment (26).
